Nisha Kumari

UI/UX Designer

nishakumari.art

₽ Profile

I am a UX designer with 5+ years of experience in the software industry wearing multiple hats, including 1.5 years in UX research and low-fidelity user-centric design. I completed Google's UX Design Specialisation course and am skilled in creating scalable and user-friendly interfaces in a fast-paced environment. I am seeking a challenging role in UX design where I can bring my passion for balancing form and function to deliver innovative solutions.

P Skills

User Experience/Interface Design (Wireframing, Mockups, Prototyping, Usability, Accessibility, Web Applications, Mobile Applications, Web Applications, Conducting Usability Studies, Prototyping, Sketching And Ideating, User Experience Design (UXD), User Experience Research (UXR))

Design Tools (Figma / Adobe XD)

Professional Experience

12.2022 - present Bangalore, India

3DesignThinkers ☑

Freelance UX Researcher

- Led user research and redesign efforts for an educational platform and website that provides UI/UX design courses and preparatory courses for national and international design school entrance exams.
- Implemented data-driven strategies to enhance user experience and navigability.
- Conducted both quantitative and qualitative user research to understand target audience needs and pain points.
- Collaborated with development team to ensure feasibility of redesign efforts.
- Designed and administered user surveys, focus groups, usability tests, and user interviews for rich data analysis.

Wipro Limited

11.2019 - 07.2022 Pune, India

Senior Project Engineer

- As a part of the UI/UX design team, conducted user research and designed lowfidelity prototypes to enhance front-end interfaces, resulting in a 30% increase in the usability of the Human Machine Interface (HMI).
- Successfully configured and implemented MES software to support the production process, resulting in a 20% increase in productivity.
- Wrote SQL queries to communicate with the CGMS database and integrated MES with ERP & PLC.
- Implemented the front-end design of the MES displays using HTML, CSS, and JavaScript.
- Followed agile practices and worked in a scrum framework to deliver the project.

04.2017 - 10.2019 Pune, India

Project Engineer

- Created REST clients for front-end web development and web services requirements, resulting in increased efficiency and productivity.
- Successfully completed code improvements and bug fixes for both front-end and back-end systems.
- I extensively collaborated with the UI/UX design team to comprehend and develop the front-end.
- Worked closely with UI/UX design team to understand and implement the frontend.
