🪪 Profile

I am a user experience designer with over five years of software development experience focusing on user centered design. I have learned to design and develop complex systems and create innovative user interfaces. I am passionate about creating products that are both user-friendly and visually appealing. In my work, I always aim to strike a balance between form and function.

💼 Professional Experience

Wipro Limited

Senior Project Engineer   11/2019 – 11/2022
                                                                                                        Pune, India
- Successfully configured and implemented MES software to support the production of Continental Tires, resulting in a 20% increase in productivity.
- Wrote SQL queries to communicate with the CGMS database and integrated MES with ERP & PLC.
- Enhanced front-end code using HTML, CSS, JavaScript and ReactJS.
- Guided and worked closely with UI/UX design team to help design and implement the front end of the MES displays.
- Following agile practices and working in a scrum framework

Project Engineer   04/2017 – 10/2019
                                                                                                        Pune, India
- Created REST clients for front-end web development and web services requirements, resulting in increased efficiency and productivity.
- Successfully completed code improvements and bug fixes for both front-end and back-end systems.
- I extensively collaborated with the UI/UX design team to comprehend and develop the front-end.
- Worked closely with UI/UX design team to understand and implement the front-end.
